

Gentleman; I have been a costumer of XM radio for a year and let me tell you I love it...It provides music , news and entertainment anywhere ,without commercials and nasty shock jockeys. I get the weather and local news. I don't want my XM radio to be limited by any bill...I'm paying for this service because this is what I like...The local radio stations put out so much garbage, commercials and stupidity that is just a real turn down for listeners like me and many others subscribers . This stations need to put their act together and provide a better service so people like me and many others turn our ears to their air waves...I strongly oppose to any iniciative to limit the services that IM PAYING FOR....  
thank you...
